

UNEP's Support to Countries to Integrate Biodiversity and Ecosystem Services into Agricultural Planning in the Context of the SDGs

Mette Wilkie
3 June 2016

SDG 2: END HUNGER, ACHIEVE FOOD SECURITY AND IMPROVED NUTRITION AND PROMOTE SUSTAINABLE AGRICULTURE

Facts:

- 795 M hungry people (1 out of 9) – most of them in Asia
- Agriculture the single largest employer in the world
- >475 M small farms worldwide
- Need to increase agricultural production by 60% by 2050 to meet demand (under BAU)

SDG 15: PROTECT, RESTORE AND PROMOTE SUSTAINABLE USE OF TERRESTRIAL ECOSYSTEMS, SUSTAINABLY MANAGE FORESTS, COMBAT DESERTIFICATION AND HALT AND REVERSE LAND DEGRADATION AND HALT BIODIVERSITY LOSS

Facts:

- Forests are home to more than **80%** of all terrestrial species
- **8,300** known animal breeds: **8%** extinct and **22%** at risk
- Micro-organisms and invertebrate key to ecosystem services, but poorly known

AGRICULTURAL IMPACTS ON BIODIVERSITY

- Habitat loss

- **50%** of the habitable land converted to farming

- A further **120 M** hectares of natural habitats converted to farmland to meet demand for food by 2050 (under BAU)

- Recent examples:

- conversion of lowland forests in Indonesia to oil palm plantations

- conversion of large areas of the Amazon rainforest and Brazilian savanna to soybean and cattle farms

AGRICULTURAL IMPACTS ON BIODIVERSITY

- Loss of genetic resources
 - **60%** of terrestrial biodiversity loss relates to food production
 - Since 1900, some **75%** of crop diversity has been lost
 - **30** crops account for **90%** of calories consumed by people
 - **14** animal species account for **90%** of all livestock production
 - Reduced potential for modern crops to adapt to, or be bred for, changing conditions → threat to long-term food security

AGRICULTURAL IMPACTS ON BIODIVERSITY

- Wasteful water consumption & pollution
 - Agriculture consumes **70%** of planet's accessible freshwater
 - Arnu Darya River – irrigation for cotton and other crops – affecting the Aral Sea

UNEP's SUPPORT TO COUNTRIES

5 As

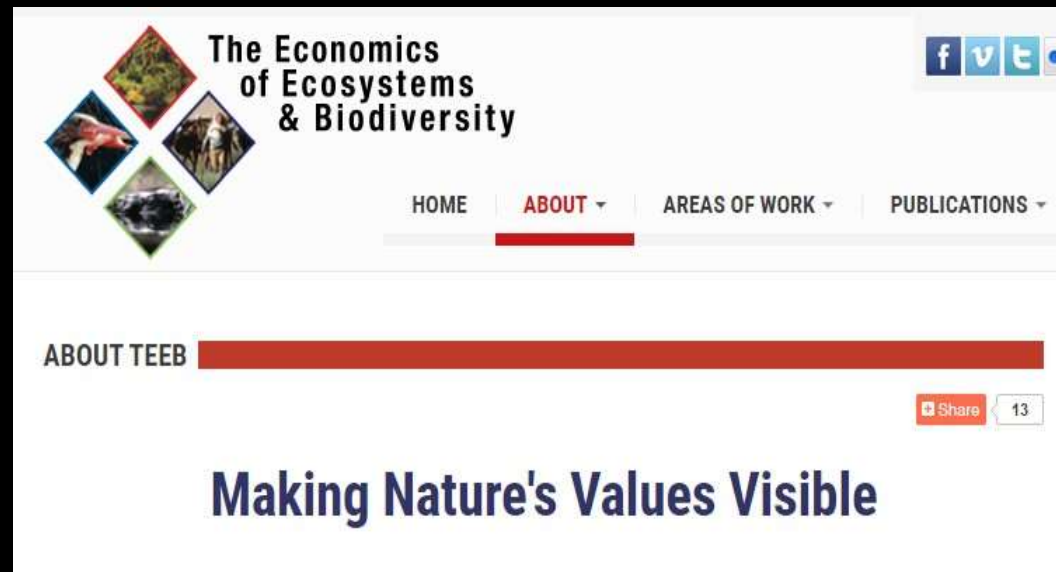

- Analysis
- Awareness
- Advice
- Alliances
- Advocacy

A1: ANALYSIS

Creating the evidence base

- Global Environmental Outlook (GEO 6)
- Spatial analysis & scenario development
- TEEB for Agriculture & for Oceans
- *State of the Apes: Industrial Agriculture and Ape Conservation*

A2: AWARENESS

Preparing the ground for action

- Communication & Outreach
- UNEPLive
- UNEA (Pastoralism, Food waste, ITW)

A3: ADVICE

Action through an Effective Science-Policy Interface

- Ecosystem Management
 - **Integrated Landscape Management**
 - 79 NBSAPs
 - Fiscal incentives & Green Landscape Bond
 - Commodities and Biodiversity/GEF Projects
- Resource Efficiency
 - **Sustainable Consumption and Production**
 - Sustainable Food Systems Programme

A4: ALLIANCES

Private sector engagement:
Global Partnership on Nutrient Management

Roundtable on Sustainable
Palm Oil

Great Apes Survival
Partnership

A5: ADVOCACY

Campaigns leading to Behavioural Change
