Five principles of sustainable agriculture

**Principle 1:** Improving efficiency in the use of resources is crucial to sustainable agriculture

**Principle 2:** Sustainability requires direct action to conserve, protect and enhance natural resources

**Principle 3:** Agriculture that fails to protect and improve rural livelihoods, equity and social well-being is unsustainable

**Principle 4:** Enhanced resilience of people, communities and ecosystems is key to sustainable agriculture

**Principle 5:** Sustainable food and agriculture requires responsible and effective governance mechanisms
Mainstreaming biodiversity

- **FAO leading partner:**
  - CBD’s Programme of Work on Agricultural Biodiversity
  - Conservation and Sustainable Use of Soil Biodiversity
  - Biodiversity for Food and Nutrition
  - International Pollinators Initiative

- **FAO intergovernmental processes:**
  - FAO Committee on Agriculture
  - FAO Committee on Fisheries
  - FAO Committee on Forestry
  - Commission on Genetic Resources for Food and Agriculture
  - International Plant Protection Convention
  - International Treaty on Plant Genetic Resources for Food and Agriculture

Partnerships with the GEF, other donors, UNEP, other UN organizations

### Thematic and cross-sectoral approaches

- Biodiversity and genetic resources
- Water
- Soil
- Climate
- Sustainable consumption and production
- Food loss and waste reduction
- Social dimensions (e.g. governance, gender, decent employment)
