2. Key messages from Consultations

**General**
- Post2020 Framework should be easy to communicate (clarity simplicity) and well articulated
  - Need to explicitly link Mission for 2030 to 2050 Vision: Link to SDGs/2030 agenda for sustainable development
    - How does 2030 Mission (and 2040 one) enable Reaching the 2050 vision
  - Current Strategic Plan provides a basis to start from. Not starting from scratch.

- **Vision** — Living in harmony with nature
  - still relevant. Need to be expressed in concrete terms

- **The goals** — take into account the four elements of the Vision 2050; also some of goals of the current Strategic Plan may still be relevant

- **Targets & Indicators**
  - need to be realistic and reachable (aspirational target leads to negative communication)
  - Need to be Specific, Measurable, Achievable, Realistic and Time bound (SMART)
  - Time length need to be relevant to issues (species recovery may be more than 10 years, legislation change can be less)
  - Geographic scope need to be adapted
2. Key Message from Consultations Framework Structure

- **Enablers**
  - Ecosystem characteristics
  - Sust. Use
  - Benefit
  - Sharing

- **Threats**
  - Small number
    - Easy to communicate
    - e.g. xx% by 2030
    - Lad Use Planning
  - Larger number
    - Directed at practitioners
    - e.g. xx% reduction in pesticide use
    - e.g. EA legislation in place by date
2. Key messages from Consultations

- **Synergies/integration with other Conventions**
- Need to have explicit linkage between biodiversity and climate change. The two should not be looked at separately
- **Enablers**
  - means of implementation needs to be in place
  - A number of tools mentioned: Environmental Impact assessment as a tool for Nature
  - Legal aspects: from stronger legal obligation to Right of nature
- **Planning, Reporting and Accountability**
  - Build on existing system including NBSAPs
  - More comprehensive
  - Better reporting
  - Improve review and accountability
- The post2020 framework should integrate the Cartagena and Nagoya Protocol on ABS

Pursuing business as usual in the post2020 will prevent reaching 2050 Vision. Look at what is good in the current strategic plan and keep, review and Change what is not good, link biodiversity to policy and decision-making agenda
2. Key message from consultations various perspective

Some see Biodiversity as challenge to Growth

Other see need to change & Biodiversity – Growth synergies

2030 Consensus

How will Consensus address IPBES assessment?
2. Key message from consultations
Voluntary Commitments

Framework
Country A NBSAP
Country B NBSAP
Country C NBSAP

Current state

Voluntary Commitment
Non State Actor voluntary commitment
3. Next steps

The post-2020 process is up and running

First planning meeting of the Co-chairs with CBD secretariat team

10-11 January 2019, Montreal, Canada
Defining Success

A process that
- will facilitate and enable decision making at CoP15
  - CoP focus on the right issues
  - CoP and parties have the element enabling them to reach consensus
- is understood and supported by parties, civil society, NGOs
- Adhere to the overarching principles guiding the preparatory process for the post-2020 global biodiversity framework
  - independent/impartial
- respect CBD decisions and promote its values
- Create good will at CoP15
- Address expectations from Parties
- Result in Post2020 global biodiversity framework that will be owned by Parties
  - This to facilitate expedient implementation
